Presentation

ErasmusX

ONLINE COURSES FOR MOBILE STUDENTS (ErasmusX) is an European KA203 project coordinated by [The University of Alcalá](#) in cooperation with:

University of Napoli Federico II

Lodz University of Technology

University of Latvia

European University Foundation

Project description

- The project will offer students the possibility to increase and add professional value to the Erasmus period abroad by **combining certified on-line academic studies with professional/sport/social experience overseas.**
- This new scheme supports **study + placement mobility** as an additional value to the current internships being done abroad.

Benefits

ErasmusX will allow exchange students to do placements abroad overcoming incompatible and scattered course schedules studying **at their pace and at the most convenient time**

Support

Students abroad will have a **systematized infrastructure of online courses** to support such opportunity gaining this online learning experience as well.

ErasmusX aims to increase Erasmus student opportunities creating a joint **online catalogue of courses** jointly developed and evaluated among partner HEI to ensure a wide variety of options for certified formal training.

Educational Areas

The initial areas will comprise **Education, Business, Economics, Engineering and Computing** but will be extended

Benefits

The image shows the ErasmusX logo at the top center. It features the text "Universidad de Alcalá" above a blue square icon containing a globe and the word "Erasmus". To the right is the large green text "ErasmusX" with a stylized "X" shape. Below this, the text "Online courses for mobile students" is written in a blue, cursive font. Underneath the main title, there is a smaller green text "KA203 Strategic Partnership" next to a blue icon of a computer monitor displaying a globe. To the right, it says "Co-funded by the Erasmus+ Programme of the European Union" next to the European Union flag.

ErasmusX will allow universities to open curricula for placements ensuring:

- ✓ +**employability**
- ✓ +acquisition of essential **professional skills** in a **2nd language**
- ✓ +**linguistic** diversity
- ✓ +**intercultural** awareness

Certification

Relevant added value to the programme will be the **institutional recognition** of the **on-line courses** facilitated by the transnational cooperation among universities.

Outcomes

The **results** derived from the development of on-line courses for Erasmus students on several pre-defined topics are **expected not only to facilitate Erasmus internships abroad, but also** to enhance **quality education with** the use of open educational resources following current **distance education** methodologies.

Summing up...

Some of the many benefits of ErasmusX placements will be:

- ✓ Possibility to offer a common educational platform open to any registered Erasmus student
- ✓ Affordable learning free of extra transnational cost
- ✓ Course visibility before enrolment
- ✓ Flexible study times not restricted to weekly timetables
- ✓ Learners can learn and work at their pace
- ✓ Accessible from anywhere; with no limited access to college or university
- ✓ Provide access to a variety of study materials and resources
- ✓ Offer of reusable intellectual capital

Contribution to the Higher Education area (HE)

This project will contribute to a **major innovation in the EHE** area by filling an existing gap **implementing innovative online training** for Erasmus students during their placements abroad, which implies the establishment of **multilateral agreements on formal education recognition** and certification.
